

## **A229 Blue Bell Hill (Northbound), Aylesford**

### **ADVANCED NOTICE – (PHASE 1)**

#### **When we plan to carry out the work and how long it will take**

This is to let you know that, as part of the on-going maintenance and improvement of the highway network, Kent County Council will be working to improve the road surface of **the A229 Blue Bell Hill (Northbound Only)**, Aylesford between the **Cobtree Roundabout to the Lord Lees Roundabout**

These road surface improvement works are programmed to start on **Sunday 16<sup>th</sup> July 2023** and should take **24 Hours** to complete. These activities will be undertaken during a **working window** between the hours of **5am (Sunday 16<sup>th</sup> July) to 5am Monday 17<sup>th</sup> July 2023**

This type of work can be affected by bad weather, so if it is not possible for us to carry it out at this time, we will arrange a new date and let you know via a letter drop to your home. We will also put-up signs along the road before we start showing the date, we plan to start work.

During these essential works it will be necessary to close the road completely so that we can carry out the works safely for both the workforce and road users. During this closure, a diversion route will be in place via the M20 Junction 6 heading coastbound, alight at M20 J7 onto the Sittingbourne Road Roundabout, A249 Detling Hill Northbound, alight onto the M2 at junction 5 leading London bound), alight onto the A229 Taddington Roundabout from the M2 at junction 3.

A non-motorway diversion will be in place for non-motorised traffic. This diversion route will be signed on site when works are live and the road closed.

**Due to the high-speed nature of this road no access will be possible while the works are live and the closure is in place.** Emergency vehicles WILL be permitted though the closure when actively responding to an emergency but must traverse the site with care.

**Once the road is reopened, a mandatory 20mph speed limit will be in force for the safety of road users. This will remain live until all phases of works are completed over the following 7 days.**

#### **What we plan to do**

We will use a process called 'Surface Dressing' to improve the road surface. Surface dressing is quick to apply, which means less disruption to road users, residents, local businesses and the emergency services. It is a cost-effective way of prolonging the life expectancy of the road before any major repair works are required. It also benefits from having a low carbon footprint.

Surface dressing is applied directly onto the existing road in two stages. The first is the application of a hot binder which is sprayed onto the road surface and the second is the laying of chippings onto the binder. (Sometimes we lay 2 or more layers of chippings depending on the design). These layers seal the surface to prevent water penetration, restore texture and improve skid resistance. The carriageway may then be rolled using a rubber wheeled roller. This is to ensure the chippings are properly embedded and stick into the binder permanently. The continued action of the traffic also helps to embed the chippings as well.

To make sure all the binder is covered with chippings, we lay enough onto the road to ensure a full covering, and to make certain there are no gaps. There will be some loose chippings left, which is quite normal, and consequently we erect 20mph speed limit signs to slow vehicles down as they pass over the new surface. These signs will be on site until the road has settled down and all programmed sweeps have been carried out.

### **Further Information on this treatment process**

Further information on Surface Dressing, including a short video presentation, can be found on our website at [www.kent.gov.uk/roads-and-travel/what-we-look-after/roads/road-resurfacing/types-of-resurfacing](http://www.kent.gov.uk/roads-and-travel/what-we-look-after/roads/road-resurfacing/types-of-resurfacing).

Alternatively, this video can be found on YouTube by searching for '[Kent County Council Surface Dressing](#)'.

### **How you can help**

It is inevitable that residents and businesses near the works will experience some disruption, but we will try to keep these to a minimum. Any pavements will remain open at all times, but vehicle access to properties will need to be restricted for a short period while work is carried out in front of each property. If you have any particular access needs, please let the workforce on site know.

We need your help to make sure the work is done as quickly as possible and to the best possible quality.

If you need more information, you can visit our website [www.kent.gov.uk/resurfacingupdates](http://www.kent.gov.uk/resurfacingupdates) to view our programme & updates, to find out how we look after the roads throughout Kent or report any faults you find on our roads. You can also view our diversion/permit details at [www.one.network](http://www.one.network). Alternatively, you can call us on **03000 41 81 81**.

***For your safety and the safety of our workforce, please drive carefully and slowly through the roadworks.***

### **WARNING – Beware Bogus Callers**

Kent County Council Highways, Transportation and Waste do not allow works to be carried out on private properties. If anyone says they are working for us or our specialist contractors and offer to carry out any work for cash, they should be treated with caution. We advise you to contact Citizen's Advice on 03444 111 444 (Monday to Friday 9.00am to 5.00pm)
